DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 20-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Herz, (U.S. Pat # 5,758,257), in view of Shaffer, (U.S. Pat # 6,704,931).

Considering claims 20 & 28, the claimed method of displaying a TV program to a viewer, comprising processing information indicative of preferences of the viewer to develop a viewer characteristic information profile for the viewer is met by Herz, col. 10, lines 6-55; col. 11, lines 15-65 thru col. 12, lines 1-55; col. 14, lines 10-65, col. 15, lines 10-60.

Storing the viewer characteristics information profile on a viewer storage device, is met by col. 40, lines 21-65; col. 41, lines 1-15; col. 45, lines 9-30. Presenting the viewer with a list of TV programs available for viewing, the programs **selected in accordance** with the characteristics information profile, is met by Herz, col. 45, lines 34-50.

Receiving input from the viewer requesting different selections, col. 45, lines 34-60. Presenting the viewer with a list of alternative TV programs for viewing the alternative list selected in accordance with an alternative characteristics information profile, is met by the disclosure in Herz that more than one customer profile maybe stored at the STT, from which the user may receive a different list of suggested programming, col. 45, lines 55-67 thru col 46, lines 1-20.

As for the amended claimed feature of the list of TV programs being **arranged in accordance** with viewer characteristics information, Herz does not explicitly teach such a feature. Nevertheless, Shaffer, which is in the same field of endeavor provides a teaching of arranging a listing of recommended programs, by ranking according to their recommendation score, (Fig. 2; col. 3, lines 1-54). It would have been obvious for one of ordinary skill in the art at the time the invention was made, to modify Herz with the feature of organizing a list by ranking according to score, at least for the improvement of allowing the viewer to see the list of programs in an order in which the programs that match the customers profile the best are clearly indicated by rank, as shown by Shaffer.

Art Unit: 2623

Considering claims 21-27, Herz meets all subject matter, col. 17, lines 35-65; col. 26, lines 5-65; col. 46, lines 1-20.

Considering claims 29-31, see Herz, col. 26, lines 1-21; col. 29, lines 1-25; col. 29, lines 30-65 & col 45, lines 20-65; col. 49, lines 1-10.

Considering claim 32, the claimed method for prestige TV programs to a viewer, comprises steps that correspond with subject matter mentioned above in the rejection of claim 20, and is likewise treated. As for the additional feature, 'without viewer input' Shaffer still meets the language since the rankings are based on recommendation scores, as opposed to a specific viewer input.
